

PRIVATE RN CONCIERGE CARE

Healthcare Navigation. Personal Attention. Elevated Care.

A private-pay service guide for individuals and families seeking greater clarity, organization, advocacy, and support throughout the healthcare journey.

AMANDA J. ANDREWS, BSN, RN

PERSONALIZED SUPPORT, WITHIN RN SCOPE

Amanda provides nursing education, health navigation, healthcare organization, advocacy, and care coordination. Services do not replace a treating provider or emergency care and do not include diagnosis or prescribing.

Private RN concierge care, elevated.

Concierge care helps clients make healthcare information easier to understand, organize, and act on. Every engagement begins with a private intake and is tailored to the client, family, location, and requested support.

Who this is for

Busy professionals Discreet, efficient support that works around demanding schedules.	Families coordinating care A clearer system for supporting a parent, partner, child, or loved one.
Multiple-provider care Help organizing visits, specialists, medication lists, labs, and next steps.	Transitions and travel Continuity support after hospitalization or while coordinating across locations.

How the process works

1

Select your state and service
Tell us where support is needed and the type of help you are looking for.

2

Choose a foundational package
Start with the level of guidance that best fits your current needs.

3

Tailor your support
Add focused services for appointments, records, transitions, travel, or family coordination.

4

Complete the private intake
Share the essential details Amanda needs to understand your goals and circumstances.

5

Receive a personal review
Amanda confirms availability, appropriate scope, recommended next steps, and final pricing.

A thoughtful first step

Submitting an intake is a request for review, not a guarantee of services. No engagement begins until scope, availability, and terms are confirmed.

Concierge packages

Essential Care Navigation

\$499

- Private RN intake
- Health information and medication-list organization
- Appointment preparation
- Personalized care summary
- Short-term follow-up support

Guided Concierge Support

\$999

Care complexity adjustments: Standard \$0 | Moderate coordination +\$150 | Complex care +\$350 | Priority start +\$200

Helpful information to have ready

Before your intake

Current providers and specialists, upcoming appointments, a medication list, recent care transitions, the primary person Amanda may communicate with, and the top three outcomes you want from concierge support.

After you submit

Amanda reviews the request privately and follows up about fit, availability, any clarifying details, and the best next step. Final pricing is confirmed before paid services begin.

Licensure, availability & compliance

Amanda currently holds the featured concierge RN licenses listed below. Selecting another state does not automatically mean clinical RN services are available there.

RN licensed states

California • Florida • Maryland • Massachusetts • New Hampshire

Other states

Requests are welcome and reviewed individually based on the client location, requested scope of support, and applicable requirements. Some non-clinical organizational or educational support may be available; availability is never guaranteed until review.

Important boundaries

- Services are provided only within applicable RN scope of practice.
- Concierge support does not replace emergency services or a client's treating healthcare providers.
- Medical diagnosis and prescribing are not included.
- Amanda does not independently practice medicine or provide services requiring another licensed provider unless legally and professionally authorized.
- Appropriate consent, authorization, and privacy requirements apply when supporting a family member.
- This is primarily a private-pay personalized service; estimates are preliminary.

Privacy and communication

Only information reasonably needed to review or provide the requested support should be shared. Communication methods, permissions, and family or caregiver involvement are confirmed during onboarding.

If needs change

The support plan can be reviewed as appointments, locations, providers, or family responsibilities change. Any adjustment remains subject to availability, scope, and written confirmation.

Urgent or emergency needs

Concierge communication is not emergency monitoring. For urgent or life-threatening concerns, call 911 or use the appropriate emergency service.

READY TO BUILD YOUR CARE PLAN?

Visit Amanda's website and use the Concierge Care Builder to select your state, package, tailored services, and preferred start timeframe.
